About Me

Dedicated web developer skilled in building user-friendly websites. Focused on clean, efficient, maintainable code for scalable applications. Passionate about learning new technologies and applying them to real-world projects. Aiming to contribute to organizational growth through innovative solutions.

Experience

Software Developer | [Kevit.io](#) (on-site)

Current

- Currently working as a Software Engineer at Kevit, gaining hands-on experience in full-stack web development.
- Working with mentors to strengthen my knowledge of the MERN stack, including MongoDB, Express.js, React.js, Nest.js and Node.js.
- Developing practical skills in building web applications, implementing features, debugging issues, working with APIs, and following professional software development practices.

Full stack Developer | [GamutX](#) (Remote) ✉

Dec 2025 - Feb 2026

- Enhanced an internal browser bookmark extension with tab-wise categorization and seamless import/export functionality
- Reduced backend API calls by 50–60% using efficient frontend caching with ReactQuery
- Developed a global job map visualizer using Leaflet.js with dynamic markers and state-based filtering
- Refactored legacy codebase by removing redundant code, restructuring routes, and resolving unmatched routing issues in Next.js

Technical Skills

- **Languages** : Java, JavaScript, C, TypeScript, Python
- **CS fundamentals** : Data structure & Algorithm, OOPs
- **Databases** : MongoDB, MS SQL, Postgresql
- **Technologies**: ExpressJS, NodeJS, NextJS, NestJS, TailwindCSS, React, Redux, Redis
- **Tools** : Firebase, Supabase, Postman, Swagger,
- **Devops** : Github Actions, Docker, Kubernetes, AWS

Professional Skills

- Problem-solving
- Adaptability
- Teamwork
- Leadership
- Communication

Projects

Service Request Management System | [GitHub](#) | [Live](#) (Semester-6)

(Next JS, Socket.io, Supabase, Prisma, Tailwind CSS, Cloudinary, Redis)

- Engineered a scalable, role-based service request platform using Next.js, React, Prisma, and PostgreSQL to streamline issue tracking across Admin, Technician, HOD, and Requester tiers.
- Optimized system performance and data fetching by implementing **React Query** for frontend state caching and **Redis for backend caching**, significantly reducing database load and API latency.
- Strengthened platform security and reliability by designing a robust **authentication** system (JWT, bcrypt, Nodemailer OTP) and implementing **API rate limiting** to prevent abuse.
- Developed dynamic, real-time dashboards using Tailwind CSS and Shadcn, featuring live chat via **Socket.io**, optimized task assignment, and server-side **pagination** for efficient large-scale data rendering

Aadaa Ecommerce Platform | [GitHub](#) | [Live](#) (Semester-4)

(React JS, Express JS, Redux, Mongo DB)

- Built a full-stack e-commerce platform using React, Express.js, Redux, and MongoDB with product listing, cart, and wishlist features.
- Implemented secure checkout flow and optimized user experience for seamless browsing and purchase completion.

Education

B.Tech Computer Science Engineering - Darshan University, Rajkot
CGPA – 8.90

Pursuing(Expected in 2027)

HSC | Tapovan School, Rajkot
Percentage – 70.46%

March 2023

SSC | Av Jasani School, Rajkot
Percentage – 83.33%

May 2021

Achievements & Extra-curricular

- 200+ coding problems solved on LeetCode
- Participated in Adaa Jaipur (Build & Brand challenge) at Marwadi University. Selected as Top 25 Finalist among 100+ teams in competitive design and branding challenge
- Teaching Assistant for Data structures in semester-4 where I have conducted labs and assisted the students for problem statements.

Interests & Languages

- **Interests:** Chess, Cricket
- **Languages:** English, Hindi, Gujarati
